

Orezone Drilling has a comprehensive Safety, Health, Environment and Quality Management System which is ISO 14001, ISO 9001 and OHSAS 18001 certified. The company's objective is to obtain the ISO 45001 by September 2018.

The Orezone Drilling SHEQ System is based on the principle of continuous improvement. This is evident when the company operates in the different countries and complies with the countries legislation and clients requirements.

It is Orezone Drilling's policy to partner with the client's Safety and Environmental effort thus resulting in adopting best practices which is beneficial to both the client and Orezone Drilling.

The basis of the SHEQ effort at the Drill Sites is to ensure the site basics are implemented correctly to prevent unnecessary incidents such as:

Fit for work (Alcohol testing)

Pre-Shift Line-up Meetings

Pre-use Inspections of equipment

Cross-shift handovers

Daily mini Risk Assessment

Risk assessments of adhoc / new tasks

Daily Planned Task Observations

Incident Reporting

Safety Reps at the Drill Sites

On-site access control and induction

Training and assessments

In addition, the SHEQ Officers conduct on-going site visits, inspection and audits. They are assisted by the HSE Representatives.

Lastly, Orezone Drilling is continuously audited by the client and the ISO Certification Company.

Orezone Drilling is continuously upgrading its Drill Fleet which includes rod handlers and other automation to reduce injuries.
